

DEFENCE CAPABILITY

**Security
Consulting
Group.**

A TRUSTED PARTNER FOR AUSTRALIA'S DEFENCE COMMUNITY

SCG specialises in the design and establishment of security for Australian Government Department of Defence facilities and includes SCEC security consultants with extensive backgrounds in physical and electronic security design and risk management.

We're well versed in the provision of security for facilities with Physical Security Zones 1-5, SAPFs, SCIFs, armouries and explosive ordnance and have expertise in managing base-wide security infrastructure for complex, high-security environments and with multiple stakeholder groups on capital projects.

With offices in five states and a **dedicated team in Canberra**, SCG's defence specialists are:

Specialist security adviser to Australian Government **Department of Defence**

Providing **protective security expertise** for **Australia's defence assets** and installations

Supporting **defence industry** and service providers through **security design and assurance**

OUR WORK

AIR7003 Phase 1: MALE RPA capability facilities SA & QLD | 2019-2020

The Australian Defence Force plans to acquire armed medium altitude long endurance (MALE) remote piloted aircraft (RPA), with permanent facilities located at RAAF Base Edinburgh, SA and RAAF Base Townsville, QLD.

SCG was engaged as SCEC security consultants for the business case, specifically the user requirement and functional design briefs and five per cent design/masterplan and feasibility report.

RAAF Base Point Cook redevelopment Point Cook, VIC | 2019-2023

The oldest continuously operating military airfield in Australia and listed on the National and Commonwealth Heritage Lists, SCG was engaged by Turner Townsend Thinc on behalf of the Australian Government Department of Defence to support Point Cook's redevelopment through SCEC consultancy and security services, including infrastructure, asset renewal and perimeter security upgrades, ensuring safe, reliable and compliant utilities and ICT.

DEFENCE

PLANNING, DESIGN & ENGINEERING

SCG has provided security planning, design, engineering and SCEC consultancy for major Department of Defence capability projects, medium and minor works. Our design work encompasses all levels of physical security zones and security technology, including SCEC-approved systems and hardware, Type 1A alarm systems, electronic access control, biometrics, acoustic security and CCTV, with overlay of operational management considerations.

SECURITY COMMUNICATIONS & TECHNOLOGY

Our specialist security infrastructure, communications and technology design and

integration experience provides a unique capability unmatched in the Australian market. This deep domain expertise in the design and implementation of security and communications systems and infrastructure has been delivered across numerous high-profile Department of Defence facilities over many years.

SECURITY RISK MANAGEMENT

SCG's end-to-end solutions mean our capability extends beyond traditional SCEC consultancy and includes security risk assessments, security management plans, gap analyses and protective security strategies. Our ability to seamlessly transition from delivery of strategic security requirements to operational implementation is supported by a dedicated team of security risk specialists.

OUR WORK

CEA Technologies Australia new head office Fyshwick, ACT | 2018-2019

CEA Technologies specialises in the design and manufacturing of advanced radar and communications solutions for military applications. SCG was appointed specialist SCEC security consultant, designer and protective security assurance adviser for a new head office on its existing site. The project scope included security design and documentation for security areas up to and including Zone 5, including a unique Zone 5-rated auditorium, enabling TS-level briefings and presentations to defence clients and users.

Type 1A SAS upgrades and Zone 4 audits across defence sites WA & VIC | 2020-2021

SCG was engaged by Ventia on behalf of the Australian Government Department of Defence to provide specialist SCEC consultancy services for the upgrade of existing Type 1 security alarm systems in Zone 5 areas. The scope also included audit and assessment of Zone 4 areas at HMAS Cerberus, Swan Island Army Detachment and Victoria Barracks in Victoria and Campbell, Leeuwin and Palmer Barracks, and RAAF Pearce in WA.
